

# Three reasons to use Heavy Data Backup products.

HEAVY DATA  
BACKUP

Data recovery services are expensive and time consuming. Also they are not guaranteed to get all of the data back.

If the media is totally lost due to misplacement, theft, fire, age related failure or any other reason then the recovery chances are near zero.

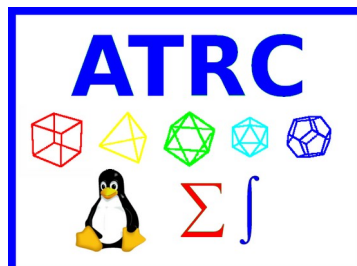

If a business faces a significant data loss, then the chances of the business being merged into another competitor business or closing within the next 1 year becomes very high.

Because if you do not take care of your customers, then someone else will.
