Muftasoft

Our integration services help you and your company in many ways.

Have a look inside to see how.

Introducing MuftaSoft(TM)

For the past 40 years since the dawn of the computer age, many people made software for fun. A lot of the software is available for free. The only thing lacking in the widespread use of such softwares is guaranteed availability of serious support from either the developers, maintainers or any third party.

MuftaSoft(TM)is a new software support company whose mission is to provide third party support for such softwares so you can use them for any of your mission critical applications knowing there is some company out there to help you when you need it.

We charge only for support and not the software. Support comes in prepaid packages, much like Internet accounts or Mobile phone cards. You pay only if your problem is solved. All types of problems are solved depending on the available technology at the time and resources required.

Some of the free softwares which we provide support for :

Office Softwares

Libreoffice

MS Office , Office 365 and Libreoffice interoperation.

OpenOffice.org

Applied Technology Research Center (ATRC) ™

Our parent company Applied Technology Research Center (ATRC) offers consultancy which is beneficial in improving profits and revenues by improving the systems which are used by our clients.

ATRC started in 1994 to specifically cater to provide support for integration between commercial and opensource applications. We specialize in management consultancy and development services for organizations and offer expert advice, independent consulting, professional services and support for projects related to Information Technology and Communications within and outside the organization.

Our key objectives are promoting good ICT management, reducing the causes of waste or resources, which lead to missed business opportunities, and helping to improve the delivery of services to the customers. We draw on substantial international experience in designing, implementing and monitoring these projects.

Development occurs on many platforms in a variety of languages, databases and frameworks. Product procurement consulting (specifications, configurations, evaluations, installations, upgrades, and sales) is also provided.

Advantages of using ATRC:

- High quality results oriented training
- Results that work and are reliable in the long term
- Quality of implementation
- Well thought out and practical solutions
- Expert assistance
- Experienced software development
- In-house, remote and on-site engineers
- Work on any task
- Ability to work 24x7 in required cases
- Best and rapid results as compared to the market.

Company Profile

Areas of services include :

- Application software training
- Computer consulting
