Our ERP is ideal for businesses looking for software that promotes workplace efficiency. This open-source enterprise resource planning software can manage project management concerns, accounting tasks, and HR responsibilities in a single interface. Our ERP can help users review staff information, gauge employee performance, delegate tasks, and analyze a company's financial health. Stock levels can also be monitored in real-time, so businesses can ensure inventory is well-equipped and day-to-day operations are supported. Modules that are part of the software include customer relationship management, asset management, manufacturing and sales management solutions. Our ERP deployment can be done either on-premise or via cloud. The number of users for the cloud version determines the amount companies need to pay.

Main features of Our ERP are:

- Cross-compatibility
- Social network and messaging service
- Production planning tool
- Leave and attendance management
- Expense claim submission
- Employee appraisal
- Embedded reporting system
- Multi-currency support
- Comprehensive user interface
- Calendar
- Flexibility
- Built-in to-do lists and projects
- Time log entries
- Management reporting
- Accounting with tax calculations
- Sales, quotations
- Support requests
- Communication reporting
- Inventory warehouse management
- Website creation and design

The main benefits of Our ERP are its easy-to-use interface, self-implementation capability, open-source solution, and centralized platform for accounting, projects, CRM, HR, and payroll, among others. It is a flexible platform that can manage financial planning, accounting, and budgeting processes, just to name a few. It is also perfect for retail, manufacturing, and distribution systems, and is even cheaper than other similar systems out in the market. Here are more benefits:

With Our ERP, users get a single solution packed with extensive features. Its metadata modeling tools and Model-View-Controller architecture eliminate the need for custom programming. It is useable on different devices and can easily be integrated with other systems. The user interface is user-friendly which can contribute to boosting productivity.

Our ERP is also an all-in-one accounting and finance tool, with multi-currency support, reports, tax calculations, and bank and payment reconciliation tools. The sales and customer relations management module can produce reports for quotations, sales, management, and communication with existing and potential customers.

Companies involved in distribution and logistics management will appreciate Our ERP's inventory management and manufacturing capabilities, which enable users to manage stocks, valuations, and inventory warehouses. Our ERP's product catalog and shopping cart module can also create websites which savvy users can use for marketing. Lastly, Our ERP can be deployed either on-premise or in the cloud and can run on both Linux and web browser operating systems.

The following integrations are currently offered available :

- Google Calendar
- Gmail
- Google Maps
- Bitium
- SphereWMS
- Frappe
- Stripe
- Dropbox
- PayPal
- SparkPost
- GitHub
