

Projects available for participants and investors.

The following are some of the products and services which we can integrate participants into projects. Our company has experience and has ready technologies to deliver these. So participants and investors can come together to sell solutions faster and get better returns.

Selling Technologies TM

We deliver techniques and technologies including support and training which help increase and maintain the sales, marketing and revenues of our customers.

Project and program duration : Short (Project), Medium (Program) and long term (Portfolio). This is an important project so we shall be focused on sustaining it and continuing on it as a program and portfolio in the long term.

Moolah TM and Naqad TM

We develop and implement technologies which assist financial institutions and organizations to use digital currencies.

Project and program duration : Short (Project) and Medium (Program). This is an important project so we shall be focused on sustaining it and continuing on it as a program. It may become a long term portfolio but currently we need to focus on the fundamental project mentioned above.
