

## The Qatar Issue and why it should not matter much.

Everything was fine until some comments came up in writing in the media and some letters.

Ignoring the media sources which can have a biased view. Lets take a look at some letters which were presented.

One letter is to Secretary Lew from two congress members.

The letter states that qatar is supporting hamas and al quaida. That should not be much of a concern because the US created al quaida to fight the USSR and resulted in the break up. So if Qatar is supporting al quaida then there is no reason for the US to worry about it. We all know that the 911 fiasco was an inside job so stop acting like you can kill three buildings with two fake stones. Thirteen years of blood soaked Afghan minerals were a good reason for the war while preventing “competition” from other african countries with slogans of blood diamonds and stuff. Serious hippocracy not diplomacy. To fund al quaida, bush paid the CIA which used the awesome distribution company BCCI to distribute to every single fighter in Afghanistan. The reason to attack the money distributor was to hide the tracks of their funding.

It states qatar is supporting hamas. Since the british created Israel in 1920 using an old word from ancient times to confuse people about the theory. The idea was to make jews and muslims fight. Well somehow the jews left their homeland in Germany and were stupid enough to go along the plan. So if qatar wants the palestinians to have their homeland back and wants to fund the return of jews to germany which is their “homeland” then there is no reason for the US to worry about that.

As far as IMF is concerned about money laundering, what a country does inside its borders about money is their own business. No matter how much the US or the IMF thinks otherwise. They shall keep blabbing about “their” policies of managing money not being implemented, but all the countries are free to do as they please. Yes VISA and Master Card do help in monitoring, but cryptocurrencies, Gold, silver and other currencies shall replace all Government currencies soon to a large extent. So stop worrying about your legislations. Keep them inside your own countries to harrass your own people.

Then the letter is asking the congress to provide info about money movement inside Qatar. Now how in heck is that the job of the congress ? And as mentioned, Qatar is not a subsidiary of the USA corp so how is this info going to even be available to USA corp ?

Mr. Trump talked to the ME countries. They felt like blaming qatar for some reason. Guess they thought Qatar should not have trade relations with Iran but USA corp can have relations. Iran is a neighbor or even in the ME countries. So NOT having trade relations is NOT in your favor you economic idiots. Gaddafi wanted to integrate the arab speaking nations and use Gold as a currency. When all the idiots could not come together he lectured them that the NATO countries shall kill all of them one by one. And so the NATO countries did pick him out because he was a threat to the USA Corp's blood which is petrodollars. Similarly saddam got killed because he wanted to sell oil in Euros.

Here is how it works. The world needs oil. If all oil is sold (under the pressure of a US gun) in US Dollars, then the US can print real or virtual dollars and get some real stuff like pay China for all the iphones and ipads it asks them to make for them. When oil is not sold in US dollars, then China can ask for the buildings, american indian lands, railroads, houses, ports in return for the iphones manufactured instead of worthless USD currency. Then the US citizens shall pay taxes and rent to China their new landlords after the japs sold them the toyotas. Kapish ?

If the US wants to avoid deep trouble, then here is some advice for Mr. Trump. Other presidents are too deeply funded by the lobbyists that they cannot heed any advice.

The chinese are running on the Sun Tzu procedure. They want to draw you out and make you weak by wasting your resources all the way into the south china sea. Taiwan is an example. Everytime you relax, they are ready to attack taiwan and you (US corp) somehow end up wasting more resources and throwing them into the ocean half way around the planet. Read Sun Tsu to understand what I mean.

If you want to make america great again, please explain to congress and the people of the USA that they are very close to defaulting. Once they default, then they lose their homes to the japs and the chinese. Game over. Asia 1 US 0. That is the game. Even the elitist who control the lobby do not really care anymore. They are mostly living in Europe and are about to die so they have less control of the current and even less of the future situation. Disclaimer, I do not want to talk against the Chinese because they seem to be doing a great job with CPEC and it is not a good idea to talk bad about a neighbor. However I just want to help the US corp realize that there might be an issue they would like to consider instead of worrying about things like qatar. As far as I know, if you mess with the Chinese, then they shall retaliate in a quiet sun tzu way. Since PK has friendly ties with every neighbor, I would like to recommend that other countries set aside their differences and learn to live well along with others. Take New Zealand as an example of a nice cordial country.

If is up to all the people of the world to wise up (and swallow less flouride) and take care of their own businesses and countries. The corporations and country boundries shall keep changing as some people get old and tired and the young ones conquer more territory. But the objective is not to leave a mark in a universe which shall be folded up to create another. But to do the best we can with the best of our knowledge and ask for God's favors in the current world and in the next world. And keep us away from the bad stuff and bad intentions.

If you want to teach me something, you are welcome to email me at the address provided below.

Regards,
