

How to get yourself to do the right thing.

By : Khawar Nehal

If the universe did not matter, then you could decide to do anything. If it were a game in some kind of matrix then you shall only be tested on your decisions.

Now if you look at the universe scientifically (including mathematics) then you may see that there are more chances of a parallel universe than a single universe.

If there are parallel universes, then you can have your own universe to live in. If one human decides to have one thing which causes another thing to not be able to exist in this universe. And the other thing is something another human wants, then it is possible that they can both have what they want, but a separate parallel universe shall be made to cater to both requests. This may sound far fetched, but me and my friends have pondered on this since the year 1991 or earlier. Long before the movie matrix was created. Think of two applications which needed the same shared libraries (DLLs in windows and Shared Objects .so in Linux). Nowadays we just create a virtual machine and run both applications separately. Since we have a lot more memory and disk space and CPU power do be able to do so. Similarly, the universe we live in is not really created as a physical manifestation. It is just a thought in the mind of God. He created it by just saying "be" and it happened. I am understanding the words to be and happen instead of created. If we consider the universe to happen, then we can see how there is not a digital universe with separate instances or an analog universe based on continuums. But multidimensional quantum mechanical universe where multiple almost infinite things are possible in almost infinitesimally small locations. Now you know why qubits can store more information than a digital bit.

Now, whenever you get too involved in this universe and think it matters too much. You can relax and think of it as a game in a simulation. Except with only one life. You are not likely to be reborn or survive jumping off a building. So you need to be careful. Avoid taking unnecessary chances. If you build your capabilities and your relationship with the creator gets closer and better, you shall notice that the universe you live in seems to automatically do what you think and want instead of you having to put a lot of effort into it. Like the kid teaches Neo in "the Matrix". There is no spoon. You still need non zero efforts but you can do as much as you want. Once you figure this out, you shall realize that if people believe in shaitan's false claims, then they start to follow shaitan and reduce and lose the link with God. They end up with a tougher universe and more despair in their life. Also it shall begin to show on their faces. They are stressed and in depression. If you notice, there are very few people dying of hunger. And they are dying not because the resources are not available. The people are not putting in the effort to move the food. This was told to me by Mr. Ahsan Rafi who said he read that this was written by Bill Gates. Maybe Bill Gates was a good person before he got influenced by the shaitan influenced people. In his TED talk he mentioned viruses as a way of population control. And was advocating population control as a way to fix global warming. Well maybe he knows or does not know, belief in God shall lead you to understand that the resources of food are plenty for the people in the planet. Also the universe is very large visibly and can support many more people. We just need to stop limiting ourselves with issues like depending on chemical energy like crude oil. Global warming is not an issue if you check the volcanoes and the sun's effect on this planet. Also viruses are used to kill via polio vaccinations and other vectors. We can come together under the same God and fix these issues. If the Jews, Christians and Muslims believe that there is one and only one God, then they cannot accept the satan propaganda that there are three different Gods for these three groups of people. You can have multiple parallel universes, but the God stays the same. So please unite against shaitan under one and only one God.

The universe does not “matter.” It is “shaped out of nothing.” So it is more of a wave rather than a particle. You can make a wave look like a particle by making it go in a circle (or ellipse) and that is called a standing wave.

Next time shaitan suggests in your heart to make the universe and the material things matter more than your purpose of as a Human to glorify God. Just remember. The universe is nothing and God is everything.

If you let your guard down, the satan influenced society and then satan himself shall get insider access to your thoughts. Life is what it is. A continuous conscious struggle to recognize the whispering of satan's ideas in your heart. You may slip often during your lifetime. But need to realize that asking God for forgiveness and those you have wronged also shall make you more eligible for heaven. Never ever fall for the suggestion by satan that if you have done better than others, you are more eligible. You are to continue to do something. The objective is not to beat others in something but to believe that you are doing it for God and not to show off. If you find yourself announcing to others you are going to pray while not being able to pray all five farz on time daily, then you know that you need to do more. A lot more. For God and your own sake and not to tell others. Remember others are not going to decide and have zero influence on God's decisions on the day of judgment. You can only do something while you are alive and others can also pray for you while you are alive and after you are gone. But that is it. Do not call anyone a kafir and mind your own business. Help others who also help others first. Help those who are dependent on you first. Then if God gives you more based on your efforts, then help others as much as you can. Do not overdo it and result in having to beg for help or taking unnecessary loans from loan sharks or banks. If you have suggestions on how to improve this, then email me. Read the quran to understand the details of what life is for and have a lovely and fun life.

Regards,

Khawar Nehal
