

The Training Company

Since 1992 The Training Company has trained over 5000 students in subjects related to Computers, Energy, Management, and Technology.

We offer courses in Pakistan and UAE. We are planning on offering courses online to expand the reach of our trainings so they can be beneficial to more people via the available Internet technologies of the time.

We are also actively looking for partners like training institutes, educational institutions, and universities to develop and deliver courses which shall be beneficial today and in the future for the students and clients.

Good for your business

Training can improve business performance, profit and staff morale.

Advantages to your business include:

- You choose what new skills your workforce gains, targeting skills to meet the needs of your operation for now and in the future
- Training your staff can result in better customer service, better work safety practices and productivity improvements
- You demonstrate to your workforce that you value them enough to invest in them, improving loyalty and staff retention. In turn, retention is a saving to you.

Courses available for training

Information Technology

ICT / General

ATRC Open Computer Driving License Course and Exam

ICT / Ecommerce

Our bitcoin course in the world. Updated for new developments.

The first class based onion page course in the world.

Digital Currencies

Block Chain

Ethereum

ICT / Programming

Arduino

Raspberry PI

Python

Go programming

Software Process Improvement (CMMI)

PHP and MySQL (LAMP)

ICT / Security

Pakistan Cyber Crime Training

Certified Ethical Hacking (CEH)

Certified in Risk and Information Systems Control CRISC

Certified Information Security Manager CISM

Penetration testing

Auditing security

Hardening organizations against cyber threats

CISSP : Certified Information Systems Security Professional

ICT / OS / Linux

Linux Redhat Courses

Linux Professional Institute - LPI

SuSe Fundamentals

SuSe Administration

OpenStack

Linux Desktop

Linux Bash Shell Course

grep, SED and AWK for Linux

Intro to Linux

Android App Development

Perl 5 Programming

Intro to C Programming

Advanced C++ Programming

Red Hat Administration Part 1

Red Hat Administration Part 2

Linux Security

Linux topics

Installation

Configurations

Network Services

Working with run levels

Emergency boot procedures, System logging

Process Administration

Setting up and managing disk quotas

Scheduling the processes using CRON & AT utilities

IP Address Assignment (Statically)

Data Backup and recovery

Linux Conf

Access Linux Shells (CLI, GUI) remotely using Telnet and SSH

IP assignment static and dynamic

DHCP Service

NFS (Network File Services)

SAMBA and SWAT

DNS Server

Apache Web Server

FTP Servers

Network Address Translation (NAT)

Network Management Services SNMP and syslog

Firewall (IP Tables)

Proxy Server (Squid)

Webmin

Asterisk Server Configuration & Management

Introduction & Installation

Extension / SIP conf

System Management

Asterisk services

Troubleshooting & Debugging

ICT / OS / Solaris

Developing and Deploying Applications on Oracle Solaris 11

Oracle Solaris 11 Advanced System Administration

Oracle Solaris 11 Security Administration

Oracle Solaris 11 System Administration

ICT / Servers

Cloud Computing

Business intelligence - Pentaho

PowerPoint 2013 One Day course - PDF
