The Training Company

ITIL[®] Foundation

Learn about process improvements, benefits, and challenges of ITIL, and get your ITIL Foundation certification.

This course features an expanded public schedule and a choice of delivery methods to suit your preference for learning style and convenience. Virtual sessions for this course are enhanced with Internet access to a live, instructor-led classroom session featuring state-of-the-art audio, easy instructor and peer interaction, and hands-on labs.

In this exciting and dynamic course, you will get an introduction to the lifecycle of managing IT services to deliver to business expectations. Using an engaging case study, you'll learn the core disciplines of ITIL best practices. Upon completing this course, you'll be well positioned to successfully complete the associated ITIL exam required for entry into the future ITIL intermediate-level training courses.

ITIL covers five core disciplines:

- Service Strategy
- Service Design
- Service Transition
- Service Operation
- Continual Service Improvement

These disciplines represent a service lifecycle framework that further enhances alignment to the business while demonstrating business value and ROI and enabling IT to solve specific operational needs.

This course includes handouts and references useful after the class, as well as practice sessions, quizzes, exam strategies, and test-taking tips.

What You'll Learn

- Key concepts of ITIL
- Important principles for improving IT operations
- Vital processes and functions
- Practical guidance for applying ITIL to everyday IT situations
- How to align with business, control costs, and improve IT service quality
- Strategies to balance IT resources

Who Needs to Attend

Anyone seeking ITIL Foundation certification and everyone interested in aligning IT with business, controlling or reducing IT costs, improving IT service quality, and balancing IT resources in the most effective manner. All IT professionals, IT project managers, IT managers, IT project or team members, coordinators, network operators, business process analysts, IT architects, consultants, systems integrators, help desk managers and staff, planners, managed service providers, outsources, application developers, and other IT-related positions.

Prerequisites

Familiarity with IT terminology and IT-related work experience are recommended.

Follow-On Courses

- ITIL® Service Lifecycle: Service Transition
- ITIL® Service Lifecycle: Service Operation
- ITIL® Service Capability: Service Offerings and Agreements
- ITIL® Service Capability: Release, Control, and Validation
- ITIL® Service Capability: Operational Support and Analysis
- An Overview of Agile Project Management

Why The Training Company ?

Emphasis on Practicing, Not Preaching

Our courses maximize learning through intensive, hands-on exercises. Our experiential design puts theory into practice and dramatically improves your learning experience, professional development, and retention. It is the difference between memorizing facts and building competency. We use more challenging scenarios and offer greater detail and practice of each concept than traditional courses, so you will return to work more knowledgeable and with greater expertise.

Flexible Courses That Fit Your Needs

Building our courses with individual lesson objects allows us to easily customize a solution that meets the needs of your organization. From editing standard course curriculum to creating a custom course that complements the best practices of your organization, we have the experience and expertise to deliver exactly what you need.
