

The Training Company

The Training Company

Six Sigma Course

Course outline

Six Sigma Implementation and Management

Building the Six Sigma Infrastructure

Six Sigma Goals and Metrics

Creating Customer-Driven Organizations

Training for Six Sigma

Six Sigma Teams

Selecting and Tracking Six Sigma Projects

Six Sigma Tools and Techniques

Introduction to DMAIC and Other Improvement Models

Problem Solving Tools

The Measure Phase

Basic Principles of Measurement

Measurement Systems Analysis

The Analyze Phase

Knowledge Discovery

Statistical Process Control Techniques

Process Capability Analysis

Normalized yield and sigma level

Statistical Analysis of Cause and Effect

The Improve Phase

Managing Six Sigma Projects

Risk Assessment

Design of Experiments (DOE)

The Control Phase

Maintaining Control After the Project

Beyond DMAIC

Design for Six Sigma (DFSS)

Lean Manufacturing and Six Sigma
